OTHER HAZARDS AFFECTING LAND AREAS

Heavy Rainfall Outlook

Refer to Weather Advisory No. 13 issued at 5:00 AM today for the heavy rainfall outlook due to TC UWAN.

Severe Winds

The wind signals warn the public of the general wind threat over an area due to the tropical cyclone. Local winds may be slightly stronger/enhanced in coastal and upland/mountainous areas exposed to winds. Winds are less strong in areas sheltered from the prevailing wind direction.

- **Significant to severe impacts** from typhoon-force winds are possible within any of the areas under Wind Signal No. 4.
- **Moderate to significant impacts** from storm-force winds are possible within any of the areas under Wind Signal No. 3.
- **Minor to moderate impacts** from gale-force winds are possible within any of the areas under Wind Signal No. 2.
- **Minimal to minor impacts** from strong winds are possible within any of the areas under Wind Signal No. 1.

Furthermore, **outside the areas under Wind Signals**, UWAN will also bring **occasionally gusty conditions** reaching strong to gale-force strength over the following areas (especially in coastal and upland areas exposed to winds):

- **Today (10 November):** Palawan, Visayas, Zamboanga Peninsula, Northern Mindanao, Dinagat Islands, SOCCSKSARGEN, Davao Occidental, and Davao Oriental.
- **Tomorrow (11 November):** Most of Luzon, Iloilo, and Guimaras.
- **Wednesday (12 November):** Batanes, Babuyan Islands, Ilocos Norte, and Ilocos Sur.

Coastal Flooding

There is a **high risk of life-threatening and damaging storm surge** with peak heights **exceeding 3.0 m** within the next 12 hours over the low-lying or exposed coastal communities of Ilocos Region, Cagayan Valley, Central Luzon, Metro Manila, CALABARZON, most of MIMAROPA, Aklan, and Antique. **Refer to Storm Surge Warning No. 11 issued at 8:00 AM today for more details.**

TROPICAL CYCLONE BULLETIN NR. 17

Typhoon UWAN (FUNG-WONG)

Issued at 8:00 AM, 10 November 2025

Valid for broadcast until the next bulletin at 11:00 AM today.

HAZARDS AFFECTING COASTAL WATERS

A Gale Warning is in effect over the seaboard of Luzon and the western seaboard of Western Visayas. For more details, refer to Gale Warning No. 9 issued at 5:00 AM today.

24-Hour Sea Condition Outlook

Up to very rough, high, or very high seas over the following coastal waters:

- **Up to 12.0 m:** The seaboard of La Union and the northern seaboard of Pangasinan.
- **Up to 9.0 m:** The eastern seaboard of Cagayan, Babuyan Islands, Isabela, and Ilocos Sur; the western seaboard of Ilocos Norte.
- **Up to 8.0 m:** The seaboard of Zambales; the northeastern seaboard of Aurora; the remaining seaboard of Pangasinan.
- **Up to 7.0 m:** The seaboard of Batanes; the remaining seaboard of Babuyan Islands and Ilocos Norte; the eastern seaboard of Albay and Sorsogon.
- **Up to 6.0 m:** The western seaboard of Bataan; the remaining seaboard of Aurora.
- **Up to 4.5 m:** The northeastern seaboard of mainland Quezon; the northern and eastern seaboard of Polillo Islands and Catanduanes; the northern seaboard of Camarines Norte and Camarines Sur; the remaining seaboard of Bataan; the seaboard of Pampanga, Metro Manila, Cavite, Batangas, Occidental Mindoro including Lubang Islands and Calamian Islands; the western seaboard of Batangas and northern mainland Palawan.
- **Sea travel is risky for all types or tonnage of vessels. All mariners must remain in port or, if underway, seek shelter or safe harbor as soon as possible until winds and waves subside.**

Up to rough seas over the following coastal waters:

- **Up to 3.5 m:** The remaining western seaboard of mainland Palawan; the seaboard of Oriental Mindoro, Marinduque, Albay, and Northern Samar; the northern seaboard of Romblon; the remaining seaboard of Quezon, Batangas, and Camarines Sur; the western seaboard of Masbate including Burias Islands; the eastern seaboard of Sorsogon and Eastern Samar.
- **Up to 3.0 m:** The seaboard of Antique including Caluya Islands, and Cagayancillo Islands; the southern seaboard of Iloilo; the western and southern seaboard of Guimaras and Negros Occidental; the western seaboard of Negros Oriental.
- **Mariners of small seacrafts, including all types of motorbancas, are advised not to venture out to sea under these conditions, especially if inexperienced of operating ill-equipped vessels.**

Up to moderate to rough seas over the following coastal waters:

- **Up to 2.5 m:** The remaining seaboard of Palawan; the northern seaboard of Zamboanga del Norte; the eastern seaboard of Caraga and Davao Region; the northern seaboard of Aklan and Capiz; the remaining seaboard of Romblon, Masbate, and Sorsogon.
- **Up to 2.0 m:** The remaining seaboard of Visayas; the northern seaboard of Northern Mindanao; the seaboard of Basilan, Sulu, and Tawi-Tawi.
- **Mariners of motorbancas and similarly sized vessels are advised to take precautionary measures while venturing out to sea and, if possible, avoid navigation under these conditions.**

TROPICAL CYCLONE BULLETIN NR. 17

Typhoon UWAN (FUNG-WONG)

Issued at 8:00 AM, 10 November 2025

Valid for broadcast until the next bulletin at 11:00 AM today.

TRACK AND INTENSITY OUTLOOK

Do not focus on the center track as it may still shift within the limit of the forecast confidence cone. Heavy rainfall, severe winds, and storm surge may still be experienced far from the landfall point or center track, and even in areas outside the forecast confidence cone. **Always refer to the latest hazard warnings currently in effect (e.g., Wind Signals, Heavy Rainfall Warnings, Storm Surge Warnings) and the information under “Other Hazards affecting Land Areas” of this bulletin for more details.**

- UWAN will move west northwestward or northwestward in the next 12 hours. Afterwards, while moving northwestward to northward over the West Philippine Sea, UWAN is forecast to re-intensify tomorrow.
- By Wednesday (12 November) morning or afternoon, UWAN will begin to turn northeastward towards Taiwan Strait and due to unfavorable environmental conditions, a weakening trend is expected throughout the remaining forecast period. On the forecast track, the center of UWAN will make landfall over western Taiwan on Thursday (13 November).

Considering these developments, the public and disaster risk reduction and management offices concerned are advised to take all necessary measures to protect life and property. Persons living in areas identified to be highly or very highly susceptible to these hazards are advised to follow evacuation and other instructions from local officials. **For heavy rainfall warnings, thunderstorm/rainfall advisories, and other severe weather information specific to your area, please monitor products issued by your local PAGASA Regional Services Division.**

The next tropical cyclone bulletin will be issued at 11:00 AM today.
