

TROPICAL CYCLONE BULLETIN NR. 19

Typhoon UWAN (FUNG-WONG)

Issued at 5:00 PM, 10 November 2025

Valid for broadcast until the next bulletin at 11:00 PM today.

“UWAN” CONTINUES TO WEAKEN WHILE MOVING AWAY FROM ILOCOS REGION.

Location of Center (4:00 PM)

The center of Typhoon UWAN was estimated based on all available data at **175 km West of Sinit, Ilocos Sur (17.8°N, 118.8°E)**

Intensity

Maximum sustained winds of **120 km/h** near the center, gustiness of up to **150 km/h**, and central pressure of **975 hPa**

Present Movement

Northwestward at 10 km/h

Extent of Tropical Cyclone Winds

Strong to typhoon-force winds extend outwards up to **850 km** from the center

TRACK AND INTENSITY FORECAST

Date and Time	Center Position			Intensity		Movement dir. and speed (km/h)
	Lat. (°N)	Lon. (°E)	Location	MSW (km/h)	Cat.	
12-Hour Forecast 2:00 AM 11 November 2025	18.7	118.2	255 km West Northwest of Laoag City, Ilocos Norte	130	TY	NNW 10

TROPICAL CYCLONE BULLETIN NR. 19

Typhoon UWAN (FUNG-WONG)

Issued at 5:00 PM, 10 November 2025

Valid for broadcast until the next bulletin at 11:00 PM today.

TROPICAL CYCLONE WIND SIGNALS (TCWS) IN EFFECT			
TCWS No.	Luzon	Visayas	Mindanao
2 Wind threat: Gale-force winds	Batanes, Cagayan including Babuyan Islands, the northwestern portion of Isabela (Santo Tomas, Santa Maria, Quezon, Roxas, Delfin Albano, San Pablo, Cabagan, San Manuel, Mallig), Apayao, Abra, Kalinga, Mountain Province, Ifugao, Benguet, Ilocos Norte, Ilocos Sur, La Union, the western and central portions of Pangasinan (Basista, Lingayen, City of Alaminos, Anda, Malasiqui, San Fabian, Mangaldan, Mapandan, Burgos, Dagupan City, Binalonan, Bolinao, Aguilar, San Manuel, Sual, Labrador, Bani, Pozorrubio, City of Urdaneta, Laoac, Mabini, San Carlos City, Manaoag, Binmaley, San Jacinto, Bugallon, Infanta, Agno, Calasiao, Santa Barbara, Dasol, Sison, Mangatarem, Urbiztondo), and the northern portion of Zambales (Santa Cruz, Candelaria)	-	-
	Warning lead time: 24 hours Range of wind speeds: 62 to 88 km/h (Beaufort 8 to 9) Potential impacts of winds: Minor to moderate threat to life and property		
1 Wind threat: Strong winds	The rest of Isabela, Quirino, Nueva Vizcaya, the rest of Pangasinan, Aurora, Nueva Ecija, the rest of Zambales, Bataan, Tarlac, Pampanga, Bulacan, Metro Manila, Cavite, Laguna, Batangas, Rizal, Quezon including Polillo Islands, Occidental Mindoro including Lubang Islands, Oriental Mindoro, Marinduque, Calamian Islands, Camarines Norte, and the northwestern portion of Camarines Sur (Sipocot, Libmanan, Lupi, Del Gallego, Ragay, Cabusao)	-	-
	Warning lead time: 36 hours Range of wind speeds: 39 to 61 km/h (Beaufort 6 to 7) Potential impacts of winds: Minimal to minor threat to life and property		

TROPICAL CYCLONE BULLETIN NR. 19

Typhoon UWAN (FUNG-WONG)

Issued at 5:00 PM, 10 November 2025

Valid for broadcast until the next bulletin at 11:00 PM today.

OTHER HAZARDS AFFECTING LAND AREAS

Heavy Rainfall Outlook

Refer to Weather Advisory No. 15 issued at 5:00 PM today for the heavy rainfall outlook due to TC UWAN.

Severe Winds

The wind signals warn the public of the **general wind threat** over an area due to the tropical cyclone. Local winds may be slightly stronger/enhanced in coastal and upland/mountainous areas exposed to winds. Winds are less strong in areas sheltered from the prevailing wind direction.

- **Minor to moderate impacts** from gale-force winds are possible within any of the areas under Wind Signal No. 2.
- **Minimal to minor impacts** from strong winds are possible within any of the areas under Wind Signal No. 1.

Furthermore, **outside the areas under Wind Signals**, UWAN will also bring **occasionally gusty conditions** reaching strong to gale-force strength over the following areas (especially in coastal and upland areas exposed to winds):

- **Today (10 November):** Palawan, Visayas, Zamboanga Peninsula, Northern Mindanao, Dinagat Islands, SOCCSKSARGEN, Davao Occidental, and Davao Oriental.
- **Tomorrow (11 November):** Most of Luzon.
- **Wednesday (12 November):** Batanes, Babuyan Islands, Ilocos Norte, and Ilocos Sur.

Coastal Flooding

There is a **moderate to high risk of life-threatening storm surge** with peak heights reaching **1.0 m to 3.0 m** within the next 12 hours over the low-lying or exposed coastal communities of Ilocos Region, Cagayan including Babuyan Islands, Isabela, Aurora, Zambales, Bataan, Cavite, Batangas, Occidental Mindoro including Lubang Island, and Calamian Islands. **Refer to Storm Surge Warning No. 12 issued at 2:00 PM today for more details.**

TROPICAL CYCLONE BULLETIN NR. 19

Typhoon UWAN (FUNG-WONG)

Issued at 5:00 PM, 10 November 2025

Valid for broadcast until the next bulletin at 11:00 PM today.

HAZARDS AFFECTING COASTAL WATERS

A Gale Warning is in effect over the seaboards of Northern and Central Luzon and the western seaboards of Southern Luzon. For more details, refer to Gale Warning No. 11 issued at 5:00 PM today.

24-Hour Sea Condition Outlook

Up to very rough or high seas over the following coastal waters:

- **Up to 7.0 m:** The seaboards of Batanes, Ilocos Region, and Zambales.
- **Up to 6.0 m:** The seaboard of Cagayan.
- **Up to 5.5 m:** The seaboards of Isabela.
- **Up to 4.5 m:** The seaboards of northern Aurora and Lubang Island; the western seaboards of Batangas, Bataan, northern Occidental Mindoro and northern mainland Palawan; the northern and western seaboards of Calamian Islands.
- **Sea travel is risky for all types or tonnage of vessels. All mariners must remain in port or, if underway, seek shelter or safe harbor as soon as possible until winds and waves subside.**

Up to rough seas over the following coastal waters:

- **Up to 4.0 m:** The seaboard of the rest of Aurora.
- **Up to 3.5 m:** The seaboards of Camarines Norte and Kalayaan Islands; the northern and eastern seaboards of Polillo Islands; the northern seaboards of Camarines Sur and Catanduanes; the western seaboards of Balabac Island and the central and southern mainland Palawan.
- **Up to 3.0 m:** The seaboard of northern mainland Quezon; the eastern seaboards of Catanduanes, Albay, Sorsogon, and Eastern Samar; the northern and eastern seaboards of Northern Samar.
- **Mariners of small seacrafts, including all types of motorbancas, are advised not to venture out to sea under these conditions, especially if inexperienced of operating ill-equipped vessels.**

Up to moderate to rough seas over the following coastal waters:

- **Up to 2.5 m:** The seaboards of Pampanga, Bulacan, Metro Manila, Cavite, Oriental Mindoro, Marinduque, Burias Island, Antique, Caluya Islands, Cuyo Islands, Cagayancillo Islands; the northern and western seaboards of Romblon; the southern seaboards of Quezon and Iloilo; the western seaboards of Camarines Sur, Aklan, Guimaras, Negros Occidental, and Negros Oriental; the remaining seaboards of Batangas, Bataan, Calamian Islands, and Occidental Mindoro.
- **Up to 2.0 m:** The seaboards of Zamboanga del Norte, Surigao del Sur and Davao Occidental; the eastern seaboard of Davao Oriental; the northern and eastern seaboards of Dinagat Islands and Siargao-Bucas Grande Islands, the southern seaboards of Negros Oriental, and Siquijor; the remaining seaboards of Palawan, Quezon, Camarines Sur, and Catanduanes.
- **Mariners of motorbancas and similarly sized vessels are advised to take precautionary measures while venturing out to sea and, if possible, avoid navigation under these conditions.**

TROPICAL CYCLONE BULLETIN NR. 19

Typhoon UWAN (FUNG-WONG)

Issued at 5:00 PM, 10 November 2025

Valid for broadcast until the next bulletin at 11:00 PM today.

TRACK AND INTENSITY OUTLOOK

Do not focus on the center track as it may still shift within the limit of the forecast confidence cone. Heavy rainfall, severe winds, and storm surge may still be experienced far from the landfall point or center track, and even in areas outside the forecast confidence cone. **Always refer to the latest hazard warnings currently in effect (e.g., Wind Signals, Heavy Rainfall Warnings, Storm Surge Warnings) and the information under “Other Hazards affecting Land Areas” of this bulletin for more details.**

- On the track forecast, UWAN will follow a recurving path and turn more northwestward today, northward tomorrow (11 November), and northeastward to eastward for the rest of the forecast period. A brief period of re-intensification may take place tonight until tomorrow while UWAN moves over the waters southwest of Taiwan, before eventually weakening from Wednesday (12 November) onwards.
- UWAN is forecast to exit PAR tonight or tomorrow early morning. It may re-enter PAR on Wednesday evening as it makes landfall over the southwestern coast of Taiwan, resulting in further weakening. It will then emerge over the waters near Ryukyu Islands on Thursday (13 November), where it is expected to eventually weaken into a remnant low on Friday (14 November).

Considering these developments, the public and disaster risk reduction and management offices concerned are advised to take all necessary measures to protect life and property. Persons living in areas identified to be highly or very highly susceptible to these hazards are advised to follow evacuation and other instructions from local officials. **For heavy rainfall warnings, thunderstorm/rainfall advisories, and other severe weather information specific to your area, please monitor products issued by your local PAGASA Regional Services Division.**

The next tropical cyclone bulletin will be issued at 11:00 PM today.
