TROPICAL CYCLONE BULLETIN NR. 23
Severe Tropical Storm UWAN (FUNG-WONG)

Issued at 5:00 PM, 11 November 2025

Valid for broadcast until the next bulletin at 11:00 PM today.

- UWAN is still outside the Philippine Area of Responsibility and will follow a recurving path turning generally northward today. It will then move northeastward from tonight until Thursday (13 November) morning, then eastward for rest of the forecast period. Due to unfavorable environmental conditions, UWAN is forecast to continue weakening throughout the rest of the forecast period.
- UWAN may re-enter PAR tomorrow (12 November) afternoon as it makes landfall over the southwestern coast of Taiwan. It will then emerge over the waters near Ryukyu Islands on Thursday, where it is expected to eventually weaken into a remnant low on Friday (14 November).

Considering these developments, the public and disaster risk reduction and management offices concerned are advised to take all necessary measures to protect life and property. Persons living in areas identified to be highly or very highly susceptible to these hazards are advised to follow evacuation and other instructions from local officials. **For heavy rainfall warnings, thunderstorm/rainfall advisories, and other severe weather information specific to your area, please monitor products issued by your local PAGASA Regional Services Division.**

The next tropical cyclone bulletin will be issued at 11:00 PM today.
