

TROPICAL CYCLONE BULLETIN NR. 24
Severe Tropical Storm UWAN (FUNG-WONG)

Issued at 11:00 PM, 11 November 2025

Valid for broadcast until the next bulletin at 5:00 AM tomorrow.

“UWAN” WEAKENS FURTHER AS IT MOVES CLOSER TO SOUTHERN TAIWAN.

Location of Center (10:00 PM)

The center of Severe Tropical Storm UWAN was estimated based on all available data at **285 km West of Itbayat, Batanes (OUTSIDE PAR) (20.9°N, 119.1°E).**

Intensity

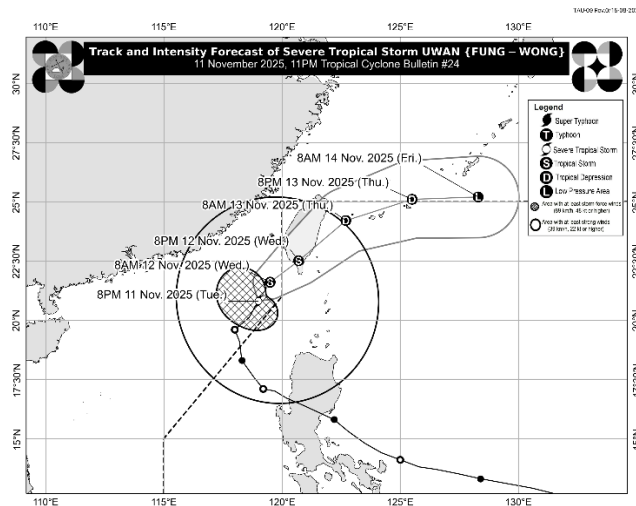

Maximum sustained winds of **95 km/h** near the center, gustiness of up to **115 km/h**, and central pressure of **990 hPa**

Present Movement

North northeastward at 15 km/h

Extent of Tropical Cyclone Winds

Strong to storm-force winds extend outwards up to **540 km** from the center

TRACK AND INTENSITY FORECAST

TROPICAL CYCLONE BULLETIN NR. 24
Severe Tropical Storm UWAN (FUNG-WONG)

Issued at 11:00 PM, 11 November 2025

Valid for broadcast until the next bulletin at 5:00 AM tomorrow.

TROPICAL CYCLONE WIND SIGNALS (TCWS) IN EFFECT			
TCWS No.	Luzon	Visayas	Mindanao
1 Wind threat: Strong winds	Batanes, the western portions of Cagayan (Pamplona, Rizal, Claveria, Lasam, Aparri, Ballesteros, Abulug, Allacapan, Sanchez-Mira, Santa Praxedes) including Babuyan Islands, Apayao, Abra, the northwestern portion of Kalinga (Balbalan, Pasil), Ilocos Norte, and the northern and central portions of Ilocos Sur (Gregorio del Pilar, Magsingal, San Esteban, Banayoyo, Burgos, City of Candon, Santa Lucia, Santiago, San Vicente, Santa Catalina, Lidlidda, Nagbukel, Sinait, San Ildefonso, Galimuyod, City of Vigan, San Emilio, Cabugao, Caoayan, San Juan, Santa, Bantay, Santo Domingo, Santa Cruz, Santa Maria, Narvacan, Salcedo)	-	-
Warning lead time: 36 hours Range of wind speeds: 39 to 61 km/h (Beaufort 6 to 7) Potential impacts of winds: Minimal to minor threat to life and property			

OTHER HAZARDS AFFECTING LAND AREAS
Severe Winds The wind signals warn the public of the general wind threat over an area due to the tropical cyclone. Local winds may be slightly stronger/enhanced in coastal and upland/mountainous areas exposed to winds. Winds are less strong in areas sheltered from the prevailing wind direction. Minimal to minor impacts from strong winds are possible within any of the areas under Wind Signal No. 1. Furthermore, outside the areas under Wind Signals , UWAN will also bring occasionally gusty conditions reaching strong to gale-force strength over the following areas (especially in coastal and upland areas exposed to winds): Today: Most of Luzon, Western Visayas, Negros Island Region, and Northern Samar. Tomorrow (12 November): Ilocos Region, Cordillera Administrative Region, Cagayan Valley, Bicol Region, Zambales, Bataan, Cavite, Quezon, and Aurora. Thursday (13 November): Batanes and Babuyan Islands.

TROPICAL CYCLONE BULLETIN NR. 24
Severe Tropical Storm UWAN (FUNG-WONG)

Issued at 11:00 PM, 11 November 2025

Valid for broadcast until the next bulletin at 5:00 AM tomorrow.

HAZARDS AFFECTING COASTAL WATERS

A Gale Warning is in effect over the northern seaboard of Northern Luzon and the western seaboards of Northern and Central Luzon. For more details, refer to Gale Warning No. 13 issued at 5:00 PM today.

24-Hour Sea Condition Outlook

Up to very rough or high seas over the following coastal waters:

- **Up to 6.0 m:** The western seaboards of Batanes and Babuyan Islands; the northern seaboard of Ilocos Norte.
- **Up to 5.0 m:** The remaining seaboards of Babuyan Islands.
- **Up to 4.5 m:** The seaboard of Ilocos Sur; the remaining seaboards of Babuyan Islands
- **Sea travel is risky for all types or tonnage of vessels. All mariners must remain in port or, if underway, seek shelter or safe harbor as soon as possible until winds and waves subside.**

Up to rough seas over the following coastal waters:

- **Up to 4.0 m:** The seaboards of La Union, Pangasinan, and Zambales.
- **Up to 3.5 m:** The western seaboard of Bataan, Batangas, and Occidental Mindoro including Lubang Islands; the northern and western seaboards of northern Palawan including Calamian Islands.
- **Up to 3.0 m:** The eastern seaboard of mainland Cagayan; the remaining western seaboard of mainland Palawan.
- **Mariners of small seacrafts, including all types of motorbancas, are advised not to venture out to sea under these conditions, especially if inexperienced of operating ill-equipped vessels.**

Up to moderate to rough seas over the following coastal waters:

- **Up to 2.5 m:** The remaining seaboards of Occidental Mindoro; the seaboard of Isabela.
- **Up to 2.0 m:** The seaboard of Aurora; the northern and eastern seaboards of Catanduanes.
- **Mariners of motorbancas and similarly sized vessels are advised to take precautionary measures while venturing out to sea and, if possible, avoid navigation under these conditions.**

TRACK AND INTENSITY OUTLOOK

- UWAN is still outside the Philippine Area of Responsibility and will begin turning generally northeastward tonight until Thursday (13 November), then eastward for rest of the forecast period. Due to unfavorable environmental conditions, UWAN is forecast to continue weakening throughout the rest of the forecast period.
- UWAN may re-enter PAR tomorrow (12 November) afternoon as it makes landfall over the southwestern coast of Taiwan. It will then emerge over the waters near Ryukyu Islands on Thursday, where it is expected to eventually weaken into a remnant low on Friday (14 November).

Considering these developments, the public and disaster risk reduction and management offices concerned are advised to take all necessary measures to protect life and property. Persons living in areas identified to be highly or very highly susceptible to these hazards are advised to follow evacuation and other instructions from local officials. **For heavy rainfall warnings, thunderstorm/rainfall advisories, and other severe weather information specific to your area, please monitor products issued by your local PAGASA Regional Services Division.**

The next tropical cyclone bulletin will be issued at 5:00 AM tomorrow.
