

TROPICAL CYCLONE BULLETIN NR. 25
Severe Tropical Storm UWAN (FUNG-WONG)

Issued at 5:00 AM, 12 November 2025

Valid for broadcast until the next bulletin at 11:00 AM today.

“UWAN” MAINTAINS ITS STRENGTH AS IT SLOWLY MOVES NORTH NORTHEASTWARD OVER THE SEAS SOUTH OF TAIWAN.

Location of Center (4:00 AM)

The center of Severe Tropical Storm UWAN was estimated based on all available data at **280 km West of Itbayat, Batanes (OUTSIDE PAR) (21.3°N, 119.2°E)**.

Intensity

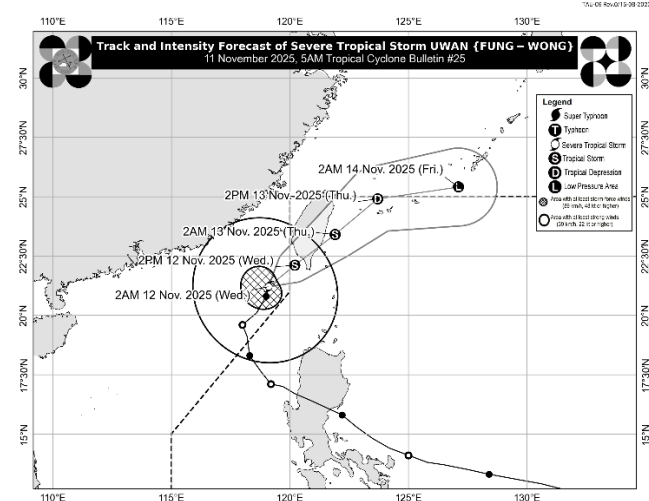

Maximum sustained winds of **95 km/h** near the center, gustiness of up to **115 km/h**, and central pressure of **990 hPa**

Present Movement

North northeastward at 10 km/h

Extent of Tropical Cyclone Winds

Strong to storm-force winds extend outwards up to **350 km** from the center

TROPICAL CYCLONE WIND SIGNALS (TCWS) IN EFFECT

TCWS No.	Luzon	Visayas	Mindanao
1 Wind threat: Strong winds	Batanes, Babuyan Islands (Calayan Is., Dalupiri Is., Fuga Is.), and the northwestern portion of Ilocos Norte (Burgos, Bangui, Pasuquin, Dumalneg, Pagudpud) Warning lead time: 36 hours Range of wind speeds: 39 to 61 km/h (Beaufort 6 to 7) Potential impacts of winds: Minimal to minor threat to life and property	-	-

TROPICAL CYCLONE BULLETIN NR. 25
Severe Tropical Storm UWAN (FUNG-WONG)

Issued at 5:00 AM, 12 November 2025

Valid for broadcast until the next bulletin at 11:00 AM today.

OTHER HAZARDS AFFECTING LAND AREAS

Severe Winds

The wind signals warn the public of the general wind threat over an area due to the tropical cyclone. Local winds may be slightly stronger/enhanced in coastal and upland/mountainous areas exposed to winds. Winds are less strong in areas sheltered from the prevailing wind direction.

- **Minimal to minor impacts** from strong winds are possible within any of the areas under Wind Signal No. 1.

Furthermore, **outside the areas under Wind Signals**, UWAN will also bring **occasionally gusty conditions** reaching strong to gale-force strength over the following areas (especially in coastal and upland areas exposed to winds):

- **Today:** Ilocos Region, Cordillera Administrative Region, Cagayan including Babuyan Islands, and Isabela.
- **Tomorrow (13 November):** Batanes and Babuyan Islands.

HAZARDS AFFECTING COASTAL WATERS

A Gale Warning is in effect over the northern seaboard and western seaboards of Northern Luzon. For more details, refer to Gale Warning No. 14 issued at 5:00 AM today.

24-Hour Sea Condition Outlook

Up to very rough seas over the following coastal waters:

- **Up to 5.0 m:** The seaboards of Batanes.
- **Up to 4.5 m:** The western seaboard of Babuyan Islands; the seaboards of Ilocos Norte.
- **Sea travel is risky for all types or tonnage of vessels. All mariners must remain in port or, if underway, seek shelter or safe harbor as soon as possible until winds and waves subside.**

Up to rough seas over the following coastal waters:

- **Up to 4.0 m:** The seaboards of Ilocos Sur, La Union, and Pangasinan.
- **Up to 3.5 m:** The remaining seaboards of Babuyan Islands; the seaboard of Zambales.
- **Up to 3.0 m:** The western seaboard of Bataan and Occidental Mindoro including Lubang Islands; the northern and western seaboards of northern Palawan including Calamian Islands.
- **Mariners of small seacrafts, including all types of motorbancas, are advised not to venture out to sea under these conditions, especially if inexperienced of operating ill-equipped vessels.**

Up to moderate to rough seas over the following coastal waters:

- **Up to 2.5 m:** The remaining seaboards of Occidental Mindoro; the seaboards of mainland Cagayan and Isabela; the remaining western seaboard of mainland Palawan.
- **Up to 2.0 m:** The eastern seaboard of northern Aurora; the northern and eastern seaboards of Catanduanes.
- **Mariners of motorbancas and similarly sized vessels are advised to take precautionary measures while venturing out to sea and, if possible, avoid navigation under these conditions.**

TROPICAL CYCLONE BULLETIN NR. 25
Severe Tropical Storm UWAN (FUNG-WONG)

Issued at 5:00 AM, 12 November 2025

Valid for broadcast until the next bulletin at 11:00 AM today.

TRACK AND INTENSITY OUTLOOK

- UWAN is forecast to move generally northeastward, re-entering the Philippine Area of Responsibility (PAR) this morning or afternoon before making landfall over the southwestern coast of Taiwan by afternoon or evening. It will then emerge over the eastern coastal waters of Taiwan towards Ryukyu Islands from tomorrow (13 November) until Friday (14 November).
- On the forecast track, UWAN will weaken into a tropical storm prior to its landfall over the southwestern coast of Taiwan. After landfall, its interaction with the landmass of Taiwan as well as unfavorable environmental conditions will trigger a continuous weakening trend until it weakens into a remnant low by Friday.

Considering these developments, the public and disaster risk reduction and management offices concerned are advised to take all necessary measures to protect life and property. Persons living in areas identified to be highly or very highly susceptible to these hazards are advised to follow evacuation and other instructions from local officials. **For heavy rainfall warnings, thunderstorm/rainfall advisories, and other severe weather information specific to your area, please monitor products issued by your local PAGASA Regional Services Division.**

The next tropical cyclone bulletin will be issued at 11:00 AM today.
