

TROPICAL CYCLONE BULLETIN NR. 26

Tropical Storm UWAN (FUNG-WONG)

Issued at 11:00 AM, 12 November 2025

Valid for broadcast until the next bulletin at 5:00 PM today.

“UWAN” CONTINUES TO WEAKEN AS IT MOVES NORTHEASTWARD SLOWLY TOWARDS TAIWAN.

Location of Center (10:00 AM)

The center of Tropical Storm UWAN was estimated based on all available data at **265 km West Northwest of Itbayat, Batanes (OUTSIDE PAR) (21.5°N, 119.4°E)**.

Intensity

Maximum sustained winds of **85 km/h** near the center, gustiness of up to **105 km/h**, and central pressure of **994 hPa**

Present Movement

Northeastward Slowly

Extent of Tropical Cyclone Winds

Strong to gale-force winds extend outwards up to **350 km** from the center

TRACK AND INTENSITY FORECAST

TROPICAL CYCLONE BULLETIN NR. 26

Tropical Storm UWAN (FUNG-WONG)

Issued at 11:00 AM, 12 November 2025

Valid for broadcast until the next bulletin at 5:00 PM today.

OTHER HAZARDS AFFECTING LAND AREAS

Severe Winds

The wind signals warn the public of the general wind threat over an area due to the tropical cyclone. Local winds may be slightly stronger/enhanced in coastal and upland/mountainous areas exposed to winds. Winds are less strong in areas sheltered from the prevailing wind direction.

- **Minimal to minor impacts** from strong winds are possible within any of the areas under Wind Signal No. 1.

Furthermore, **outside the areas under Wind Signals**, UWAN will also bring **occasionally gusty conditions** reaching strong to gale-force strength over the following areas (especially in coastal and upland areas exposed to winds):

- **Today:** Ilocos Region, Cordillera Administrative Region, Cagayan including Babuyan Islands, and Isabela.
- **Tomorrow (13 November):** Batanes and Babuyan Islands.

HAZARDS AFFECTING COASTAL WATERS

A Gale Warning is in effect over the seaboard of Extreme Northern Luzon. For more details, refer to Gale Warning No. 15A issued at 11:00 AM today.

24-Hour Sea Condition Outlook

Up to very rough seas over the following coastal waters:

- **Up to 4.5 m:** The seaboard of Batanes.
- **Sea travel is risky for all types or tonnage of vessels. All mariners must remain in port or, if underway, seek shelter or safe harbor as soon as possible until winds and waves subside.**

Up to rough seas over the following coastal waters:

- **Up to 4.0 m:** The seaboard of Ilocos Norte; the northern and western seaboards of Babuyan Islands; the western seaboard of northern Ilocos Sur.
- **Up to 3.5 m:** The seaboards of Zambales and Kalayaan Islands; the remaining seaboards of Ilocos Sur; the western seaboards of northern La Union and Pangasinan.
- **Up to 3.0 m:** The remaining seaboards of Babuyan Islands, La Union, and Pangasinan; the western seaboard of Bataan, northern Occidental Mindoro including Lubang Island, Calamian Islands, and northern Palawan.
- **Mariners of small seacrafts, including all types of motorbancas, are advised not to venture out to sea under these conditions, especially if inexperienced of operating ill-equipped vessels.**

Up to moderate to rough seas over the following coastal waters:

- **Up to 2.5 m:** The northern seaboard of Cagayan; the western seaboard of Batangas.
- **Up to 2.0 m:** The seaboards of Isabela and northern Aurora; the northern and eastern seaboards of Catanduanes; the northern seaboard of Occidental Mindoro.
- **Mariners of motorbancas and similarly sized vessels are advised to take precautionary measures while venturing out to sea and, if possible, avoid navigation under these conditions.**

TROPICAL CYCLONE BULLETIN NR. 26

Tropical Storm UWAN (FUNG-WONG)

Issued at 11:00 AM, 12 November 2025

Valid for broadcast until the next bulletin at 5:00 PM today.

TRACK AND INTENSITY OUTLOOK

- UWAN is forecast to move generally northeastward, re-entering the Philippine Area of Responsibility (PAR) this afternoon before making landfall over the Southern Taiwan by this evening. It will then emerge over the eastern coastal waters of Taiwan towards Ryukyu Islands tomorrow (13 November).
- UWAN will continue to weaken due to unfavorable conditions and land interaction upon making landfall in Taiwan, until it eventually weakens into a remnant low by Friday (14 November).

Considering these developments, the public and disaster risk reduction and management offices concerned are advised to take all necessary measures to protect life and property. Persons living in areas identified to be highly or very highly susceptible to these hazards are advised to follow evacuation and other instructions from local officials. **For heavy rainfall warnings, thunderstorm/rainfall advisories, and other severe weather information specific to your area, please monitor products issued by your local PAGASA Regional Services Division.**

The next tropical cyclone bulletin will be issued at 5:00 PM today.
