

TROPICAL CYCLONE BULLETIN NR. 27
Tropical Storm UWAN (FUNG-WONG)

Issued at 5:00 PM, 12 November 2025

Valid for broadcast until the next bulletin at 11:00 PM today.

“UWAN” RE-ENTERS THE PHILIPPINE AREA OF RESPONSIBILITY AND IS NOW APPROACHING SOUTHERN TAIWAN.						
Location of Center (4:00 PM)						
The center of Tropical Storm UWAN was estimated based on all available data at 210 km Northwest of Itbayat, Batanes (21.9°N, 120.2°E) .						
Intensity						
Maximum sustained winds of 75 km/h near the center, gustiness of up to 90 km/h , and central pressure of 996 hPa						
Present Movement						
East northeastward at 10 km/h						
Extent of Tropical Cyclone Winds						
Strong to gale-force winds extend outwards up to 300 km from the center						
TRACK AND INTENSITY FORECAST						
Date and Time	Center Position			Intensity		Movement dir. and speed (km/h)
	Lat. (°N)	Lon. (°E)	Location	MSW (km/h)	Cat.	
12-Hour Forecast 2:00 AM 13 November 2025	22.7	121.4	220 km North Northwest of Itbayat, Batanes	55	TD	NE 15
24-Hour Forecast 2:00 PM 13 November 2025	25.1	124.6	555 km North Northeast of Itbayat, Batanes (OUTSIDE PAR)	-	LOW	NE 35

TROPICAL CYCLONE WIND SIGNALS (TCWS) IN EFFECT			
TCWS No.	Luzon	Visayas	Mindanao
1	Batanes	-	-
Wind threat: Strong winds	Warning lead time: 36 hours Range of wind speeds: 39 to 61 km/h (Beaufort 6 to 7) Potential impacts of winds: Minimal to minor threat to life and property

TROPICAL CYCLONE BULLETIN NR. 27

Tropical Storm UWAN (FUNG-WONG)

Issued at 5:00 PM, 12 November 2025

Valid for broadcast until the next bulletin at 11:00 PM today.

OTHER HAZARDS AFFECTING LAND AREAS

Severe Winds

The wind signals warn the public of the general wind threat over an area due to the tropical cyclone. Local winds may be slightly stronger/enhanced in coastal and upland/mountainous areas exposed to winds. Winds are less strong in areas sheltered from the prevailing wind direction.

- **Minimal to minor impacts** from strong winds are possible within any of the areas under Wind Signal No. 1.

Furthermore, **outside the areas under Wind Signals**, UWAN will also bring **occasionally gusty conditions** reaching strong to gale-force strength over the following areas (especially in coastal and upland areas exposed to winds):

- **Today:** Batanes, Babuyan Islands, and Ilocos Norte.
- **Tomorrow (13 November):** Batanes and Babuyan Islands.

HAZARDS AFFECTING COASTAL WATERS

A Gale Warning is in effect over the seaboard of Extreme Northern Luzon. For more details, refer to Gale Warning No. 16 issued at 5:00 PM today.

24-Hour Sea Condition Outlook

Up to very rough seas over the following coastal waters:

- **Up to 4.5 m:** The western seaboard of Batanes.
- **Sea travel is risky for all types or tonnage of vessels. All mariners must remain in port or, if underway, seek shelter or safe harbor as soon as possible until winds and waves subside.**

Up to rough seas over the following coastal waters:

- **Up to 4.0 m:** The northern seaboard of Babuyan Islands; the remaining seaboard of Batanes.
- **Up to 3.5 m:** The seaboards of Ilocos Norte and Ilocos Sur; the western seaboard of Pangasinan.
- **Up to 3.0 m:** The seaboards of La Union and Zambales; the western seaboard of northern Occidental Mindoro including Lubang Island; the remaining seaboards of Babuyan Islands and Pangasinan.
- **Mariners of small seacrafts, including all types of motorbancas, are advised not to venture out to sea under these conditions, especially if inexperienced of operating ill-equipped vessels.**

Up to moderate to rough seas over the following coastal waters:

- **Up to 2.5 m:** The seaboards of Kalayaan Islands; the northern and western seaboard of Palawan including Calamian Islands; the northern seaboard of mainland Cagayan.
- **Up to 2.0 m:** The seaboards of Isabela and northern Aurora; the northern and eastern seaboards of Catanduanes; the northern seaboard of Occidental Mindoro; the remaining western seaboard of Occidental Mindoro.
- **Mariners of motorbancas and similarly sized vessels are advised to take precautionary measures while venturing out to sea and, if possible, avoid navigation under these conditions.**

TROPICAL CYCLONE BULLETIN NR. 27

Tropical Storm UWAN (FUNG-WONG)

Issued at 5:00 PM, 12 November 2025

Valid for broadcast until the next bulletin at 11:00 PM today.

TRACK AND INTENSITY OUTLOOK

- UWAN is forecast to move generally northeastward until it makes landfall over southern Taiwan by this evening. It will then emerge over the eastern coastal waters of Taiwan towards Ryukyu Islands tomorrow (13 November).
- UWAN will continue to weaken due to unfavorable conditions and land interaction upon making landfall in Taiwan, until it eventually weakens into a remnant low.

Considering these developments, the public and disaster risk reduction and management offices concerned are advised to take all necessary measures to protect life and property. Persons living in areas identified to be highly or very highly susceptible to these hazards are advised to follow evacuation and other instructions from local officials. **For heavy rainfall warnings, thunderstorm/rainfall advisories, and other severe weather information specific to your area, please monitor products issued by your local PAGASA Regional Services Division.**

The next tropical cyclone bulletin will be issued at 11:00 PM today.
