

TROPICAL CYCLONE BULLETIN NR. 30F
Low Pressure Area (formerly "UWAN")
Issued at 11:00 AM, 13 November 2025

"UWAN" WEAKENS INTO A REMNANT LOW.

Location of Center (10:00 AM)

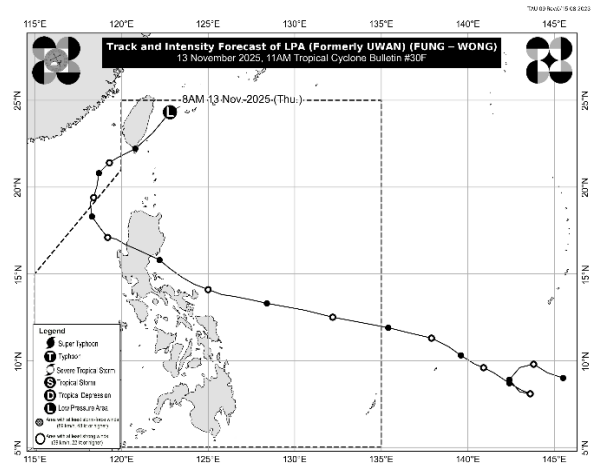

The Low Pressure Area (formerly "UWAN") was estimated based on all available data at **490 km North Northeast of Itbayat, Batanes (24.9°N, 123.6°E).**

Intensity

Central pressure of **1002 hPa**

Present Movement

Northeastward at 25 km/h

OTHER HAZARDS AFFECTING LAND AREAS

Severe Winds

The Northeast Monsoon will bring **occasionally gusty conditions** reaching strong to gale-force strength over the following areas (especially in coastal and upland areas exposed to winds):

- **Today:** Batanes and Babuyan Islands

HAZARDS AFFECTING COASTAL WATERS

24-Hour Sea Condition Outlook

Up to very rough seas over the following coastal waters:

- **Up to 4.5 m:** The seaboard of Batanes.
- **Sea travel is risky for all types or tonnage of vessels. All mariners must remain in port or, if underway, seek shelter or safe harbor as soon as possible until winds and waves subside.**

Up to rough seas over the following coastal waters:

- **Up to 3.5 m:** The northern seaboard of Babuyan Islands.
- **Up to 3.0 m:** The northern seaboard of Ilocos Norte and mainland Cagayan; the remaining seaboard of Babuyan Islands.
- **Mariners of small seacrafts, including all types of motorbancas, are advised not to venture out to sea under these conditions, especially if inexperienced of operating ill-equipped vessels.**

Up to moderate to rough seas over the following coastal waters:

- **Up to 2.5 m:** The remaining seaboard of Ilocos Region; the northern and western seaboard of Palawan including Calamian Islands.
- **Up to 2.0 m:** The seaboard of Zambales; the western seaboard of Bataan and Lubang Island; the remaining seaboard of Calamian Islands.
- **Mariners of motorbancas and similarly sized vessels are advised to take precautionary measures while venturing out to sea and, if possible, avoid navigation under these conditions.**

TROPICAL CYCLONE BULLETIN NR. 30F

Low Pressure Area (formerly "UWAN")

Issued at 11:00 AM, 13 November 2025

TRACK AND INTENSITY OUTLOOK

Due to unfavorable conditions, UWAN weakened into a Low Pressure Area at 8:00 AM today. This remnant low will continue to move generally east northeastward towards the southern portion of Ryukyu Islands and may dissipate within the next 24 hours.

Considering these developments, the public and disaster risk reduction and management offices concerned are advised to take all necessary measures to protect life and property. Persons living in areas identified to be highly or very highly susceptible to these hazards are advised to follow evacuation and other instructions from local officials. **For heavy rainfall warnings, thunderstorm/rainfall advisories, and other severe weather information specific to your area, please monitor products issued by your local PAGASA Regional Services Division.**

Unless re-development and re-entry occur, this is the final bulletin for this weather disturbance.
